

Family Maternity Center

At Alice Hyde Medical Center, we understand the importance of family-centered, personal care when you and your family welcome your newest member. To make sure that new families have a memorable and comfortable birthing experience, the Alice Hyde Family Maternity Center was redesigned in April 2002 under the guidance of our nursing staff.

Today, the Family Maternity Center has seven private rooms in which our skilled nurses care for new mothers and their infants. Mothers stay in the same room throughout the birthing experience—from labor and delivery until the family leaves for home. Because healthy beginnings start with the entire family and hands-on parenting experience, we offer accommodations so that partners can stay overnight with the new mother and baby.

Whirlpool tubs and a celebratory dinner for new parents are just some of the amenities offered by the Family Maternity Center.

To help and support new mothers and their families, our nurses and other skilled staff offer guidance and training in areas such as childbirth options and decisions, women's health issues, parenting skills, caring for yourself and newborn, proper car seat installation and breastfeeding.

You can have peace of mind knowing that our qualified, caring nurses and physicians are dedicated to making sure that you have the very best care to make your family birthing experience safe, comfortable and enjoyable.
