
Medical Imaging

Being able to quickly and accurately diagnose illness and injury is the first step towards a successful treatment plan for patients. At Alice Hyde Medical Center, we offer the most advanced technology and services for diagnostic imaging so that physicians have more precise and faster results so that treatment can begin right away.

However, it takes more than just technology and equipment to make swift, accurate diagnoses. Our experienced Board Certified Radiologists, caring nurses, highly trained technologists and skilled clerical staff all work together to meet the needs and concerns of our patients and their primary care providers.

The department features the very latest in imaging technology, including:

- Bone Densitometry
- CT Scan
- Diagnostic and Intra-operative imaging
- Mammography/Portable Mammography
- MRI
- Nuclear Medicine
- PACS (Picture Archiving Communication System)
- PET Scan
- Ultrasound

Because women have unique needs and desires, Alice Hyde Medical Center houses a Women's Imaging Center for both mammography and bone densitometry services.

We do our best to accommodate patient's busy lives by scheduling convenient appointments. Please call Central Scheduling for an appointment, 518-481-2500.
