

Alice Hyde Medical Center

Orthopedics & Sports Medicine

At Alice Hyde Orthopedic and Sports Medicine Center, Board Certified physicians and professionals provide advanced medical care using cutting-edge technology and sophisticated techniques. Because the Center integrates its services with Alice Hyde's operating room, emergency department, and inpatient and physical therapy departments, you get immediate, multidisciplinary and continuous care for your orthopedic needs.

A wide range of injuries and physical conditions are evaluated and treated at the Center, including:

- fractures
- sprains and strains
- tendon and ligament injuries of different joints and body areas (shoulder, elbow, wrist and hand, hip, knee, ankle)
- peripheral nerve entrapment (carpal tunnel, cubital tunnel)
- degenerative and inflammatory diseases of joints (arthrosis and arthritis of the shoulder, hip, knee, etc.)

Arthroscopic surgery of the shoulder, hip, knee, and ankle and minimally invasive hip and knee replacement procedures are integral parts of our surgical techniques. Top of the line implants, including ceramic, metal-on-metal, and gender-specific components are used for replacements in end-stage joint diseases.
